

Video Streaming Service - Performance Testing

Performance testing ensures streaming platforms handle 100+ concurrent viewers without buffering, crashes, or silent failures.

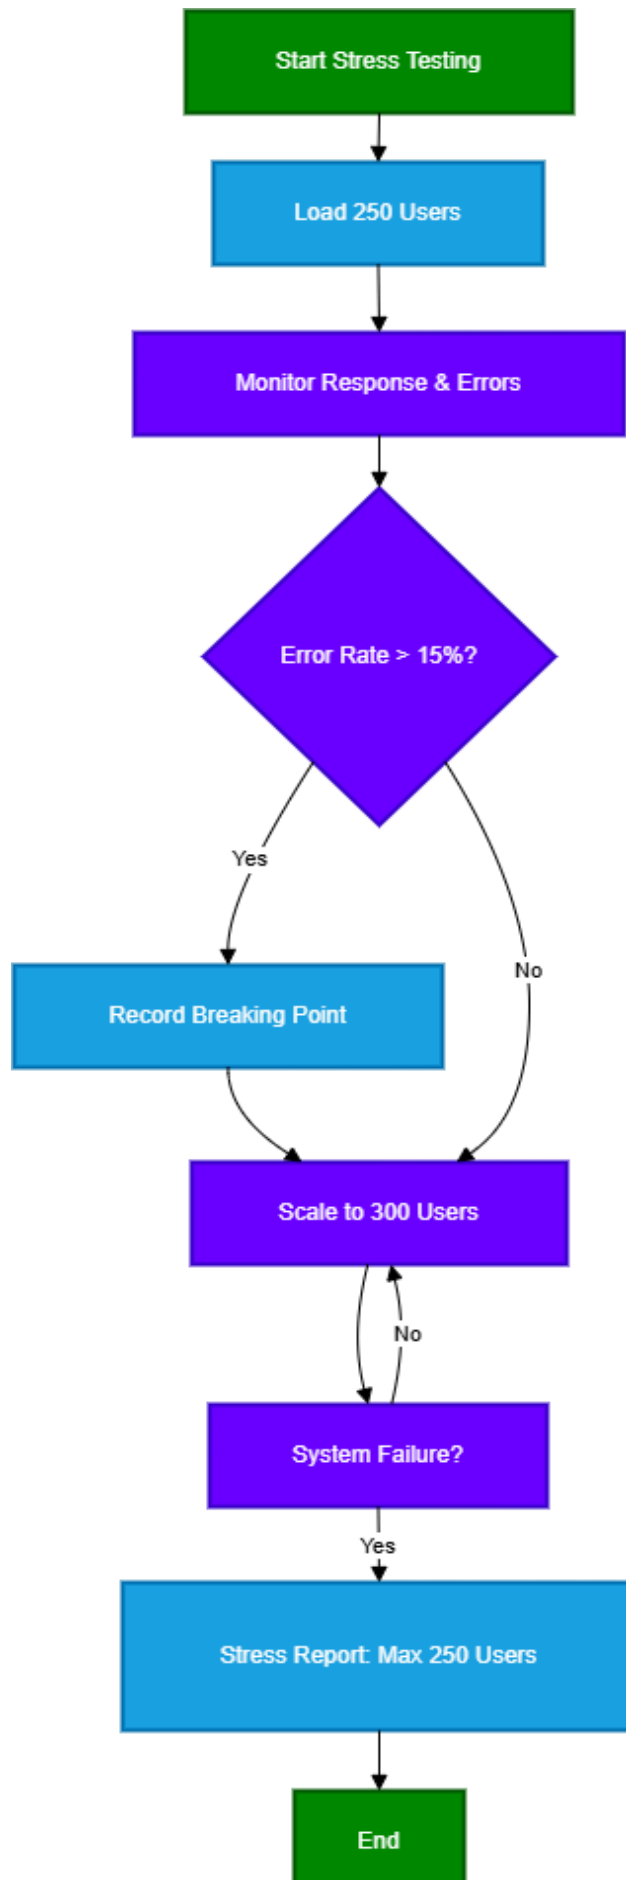

Overview:

Test Type	Purpose	Key Metrics	Target Users	Expected Outcome
Load	Normal capacity	RT <3s, Error <5%	50-200	PASS up to 200
Stress	Breaking point	CPU 100%, Crash	250-400	FAIL at 300+
Scalability	Auto-scaling	Stable RT, +Throughput	100→400	PASS
Soak	Long-term stability	Memory leak detection	100 (72h)	FAIL (+2.4GB leak)
